APPLICATION FOR INVESTIGATION

Applicant's Company Name:

Street Address:	City, State, Postal Code, Country:
Contact Person:	Phone Number:
e-mail address:	Fax Number:

Service applied for:

- GS Mark Certification from CB Pre-compliance verification Other _____
 Bauart Certification from CB SASO Certification

(Product Description and Model No.)

SUMMARY OF TERMS:

- 1) All account balances must be paid within 30 days after the "Invoice Date".
- 2) Invoices are rendered **Net 30 days**. A late charge of 1 1/2% per month (18% per annum) will be added to any amounts which are not paid within 60 days of invoice date. Should it become necessary to refer this account to an attorney for collection, the applicant agrees to pay all costs of collection, including court costs and attorney fees.
- 3) This instrument contains the entire agreement between the parties and no charges in the agreement can be made without the written acceptance of The Product Safety Zone.

Test procedure

After placing the order, the CLIENT supplies The Product Safety Zone with at least one test sample (if required), free of charge together with the complete technical documentation required for the evaluation (e.g. constructional data forms, operating instructions, certificates for safety relevant components, CB certificate and test report, and other technical documentation per the "Approval checklist").

The test sample is tested, and the documentation is reviewed on the basis of the statutory provisions and regulations. If no norms, standards or statutory provisions exist on the nature and scope of the testing, The Product Safety Zone lays down, either alone or in collaboration with the CLIENT, a test program. The test orders are processed on the assumption of the submission in full of all necessary documents and test samples in the sequence in which the orders are received.

If the CLIENT wishes the product testing to result in a test mark license and if the advancement of the test indicates a positive progress, TÜV Rheinland performs, in coordination with the CLIENT, an initial factory inspection, during which the manufacturing process, assembly and test facilities and also quality assurance measures are checked that are essential for the continuous observance of a quality level consistent with the product evaluated.

On completion of the test procedure the CLIENT receives a written report or an abbreviated report or, in the case of an appraisal, an expert report.

If the tests reveal defects, this report (non-conformity report) lists the deviations noted.

Except in the case of an appraisal, the full test report is made available to the CLIENT only by special request and for a separate charge.

If the test procedure has not produced any objections to a product certification, the favorable test report is forwarded with the associated documentation to the appropriate PCB for certification.

Offers

Until final conclusion of the contract or written confirmation of the order, offers made by The Product Safety Zone particularly as regards scope, execution, prices and time limits, shall remain conditional and shall not be binding.

Scope of performance

The agreed services shall be performed in accordance with the generally recognized rules of technology and in compliance with the regulations in force at the time of confirmation of the order, unless otherwise expressly stated in writing.

On execution of the operations, there shall be no simultaneous assumption of any guaranties of the correctness (proper quality) and working order of either tested or examined parts nor of the installation as a whole; in particular, no responsibility shall be accepted for documentation, design, choice of materials and building of installations examined, unless these questions are expressly covered by the contract. This shall be similarly applicable to safety programs or safety regulations.

The Product Safety Zone is the provider of consultation services only, and does not guarantee the product(s) will comply with the applicable test standard, nor guarantees GS or Bauart certification provided by TÜV Rheinland. The Product Safety Zone and its employees accept no responsibility for products not in compliance with the applicable test specification.

Performance times and deadlines

The performance times and deadlines agreed in the contract shall be based on estimates of the extent of the work according to particulars supplied by the CLIENT. They shall be binding only if The Product Safety Zone gives express written confirmation that they are binding.

Confidentiality

The Product Safety Zone and its employees are bound not to disclose any facts, which come to their knowledge as a result of the order. Written documents, drawings, plans etc. made available to The Product Safety Zone and relevant to the execution of the order may be copied (photocopied) for the records of The Product Safety Zone.

The undersigned Applicant agrees to abide by all the terms and conditions stated in this document.
