

# The Product Safety Zone

## TÜV GS (end product) and Bauart (component) Approval Checklist

The following items are required to be submitted to The Product Safety Zone in order to initiate the product investigation:

- ✓ CB Certificate
- ✓ CB Report
- ✓ Constructional Data Form (*Critical components list*) Completed by The Product Safety Zone and sent to the applicant for signature)
- ✓ 2 sets of Instructions (*In the language of the Country where the product will be installed. Both user and installation instructions are required for IEC61010 products.*)
- ✓ The Product Safety Zone application (*Download from the PSZ website*)
- ✓ TÜV application (*Download from the PSZ website*)
- ✓ TÜV Client Profile and TÜV General Terms and Conditions (*If currently not a customer of TÜV Rheinland of N.A., Inc. Download from the PSZ website. A factory inspection will be required prior to the issuance of authorization letters or certificates*)

The following items are only required if they are not included as an attachment in the CB Report:

- ✓ 2 sets of photos (inside and outside of product)
- ✓ 2 sets of PC board artwork
- ✓ 2 sets of Schematics
- ✓ Critical component licenses or datasheets (*Dependent on component, The Product Safety Zone will review the data and contact you if further information is required. Note: for components that only carry a CB certification, a copy of the CB certificate and CB report are required along with the information above.*)
